Laser Marking, Welding & Cutting

One of the world's leading laser machine manufacturers has selected Artesyn's LCM1500 series AC-DC power supply for its latest cutting machine, which will be used in the manufacture of metal parts for automobiles, small tools and other applications. The customer was looking for a cost-effective power supply but didn't want to cut any corners in terms of reliability. This is the sweet spot for Artesyn's LCM series single-output bulk front end power supplies. Backed by Artesyn's legendary high quality and with a best-cost design and manufacturing process, the LCM series was definitely cut out for this kind of application.

Industrial Lasers

Lasers are used in a wide range of applications in materials processing, defense, graphic arts, microelectronics, scientific research, life sciences and medical. A manufacturer of these specialist products is using Artesyn's MicroMP (uMP) configurable power supply in several of their models, to provide multiple outputs and high reliability. The digital capabilities of Artesyn's power supplies gives the customer unparalleled control and flexibility.
