Absence of hazardous substances RoHS - REACH

Information on RoHS

Free of hazardous substances according to RoHS Directive 2011/65/EU, as well as in addition to including delegated Directive 2016/1029

The materials used in the manufacture of our products are free of hazardous substances and comply with Directive 2011/65/EU as well as in addition to including the delegated Directive 2016/1029.

Information on REACH

European Regulation concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (Regulation (EC) No. 1907/2006)

As a manufacturer of measuring and control devices for non-contact temperature measuring and infrared calibration sources, LumaSense Technologies GmbH is exempted from pre-registration under REACH. Following intensive discussions with our raw material suppliers we can assume, according to our current state of knowledge, that none of our products contains any chemicals listed as Substances of Very High Concern in a concentration above 0.1 % according to the Candidate List (SVHC List from 12th January of 2017), which is constantly updated by the EU. Furthermore, safety data sheets are available for all raw materials processed in our products and for all auxiliary materials which may pose a risk. These safety data sheets are regularly updated and checked for compliance with the REACH Regulation. Should we identify any substance of concern according to REACH, we will take immediate action and replace the material in question.
